(PSAR)

Date of Submission : 09/11/2020

Dear **Prajapati Sanjay Suresh,**

Studied Patent Number for generation of PSAR	:	20BE7_170860116021_3

PART 1: PATENT SEARCH DATABASE USED

1. Patent Search Database used	:	PatentScope (WIPO Patent Database)
Web link of database	:	http://patentscope.wipo.int/search/en/search.jsf
2. Keywords Used for Search	:	Lawyer,Advocate,App
3. Search String Used	:	lawyer AND advocate
4. Number of Results/Hits getting	:	73

PART 2: BASIC DATA OF PATENTED INVENTION /BIBLIOGRAPHIC DATA

5. Category/ Field of Invention	:	
6. Invention is Related to/Class of Invention	:	computer
6 (a) : IPC class of the studied patent	:	G06Q 50/18
7. Title of Invention	:	LAWYER MATCHING SERVER, LAWYER MATCHING SERVICE OFFERING METHOD, CLIENTELE TERMINAL APPLICATION FOR LAWYER MATCHING SERVICE AND LAWYER TERMINAL APPLICATION FOR LAWYER MATCHING SERVICE
8. Patent No.	:	
9. Application Number	:	2017167946
9 (a) : Web link of the studied patent	:	https://patentscope.wipo.int/search/en/detail.jsf?docId=JP275247951&_cid=P21-KHALU3-40678-1
10. Date of Filing/Application (DD/MM/YYYY)	:	31/08/2017
11. Priority Date (DD/MM/YYYY)	:	
12. Publication/Journal Number	:	2019046113
13. Publication Date (DD/MM/YYYY)	:	22/03/2019
14. First Filled Country : Albania	:	108

15. Also Published as

Sr.No	Country Where Filled	Application No./Patent No.
1	Japan	2017167946

16. Inventor/s Details.

Sr.No	Name of Inventor	Address/City/Country of Inventor
1	SASAKI TAKAHITO	Japan
2	SUGANO YOSHIYUKI	Japan
3	KASAI TAKESHI	Japan

17. Applicant/Assignee Details.

Sr.No	Name of Applicant/Assignee	Address/City/Country of Applicant
1	AOS LEGALTECH INC	Japan

18. Applicant for Patent is   **:**   Individual

PART 3: TECHNICAL PART OF PATENTED INVENTION

19. Limitation of Prior Technology / Art

The present invention has been to solve the problems described above, lawyers publicly publicise their specialized field in a generally convenient way, the customer is to provide a lawyer matching server and lawyer matching services for to be able to receive the providing of legal consultation information and litigation information and appropriate lawyer information to be requested by the client.

Another purpose of the present invention is to provide a lawyer matching service providing device and method so that the customer can effectively help the understanding of the lawyer for legal consultation by uploading together the evidence material corresponding to the information of the legal consultation together with the legal consultation, to be able to provide the selected lawyer who has a voluntary feeling of litigation, etc. to the customer.

And other purposes of the present invention are not limited to the purposes mentioned above, it can be clearly understood by those skilled in the art from the following description.

20. Specific Problem Solved / Objective of Invention

To provide a lawyer matching server that offers information on a legal consultation commissioned by a clientele or case information, and information on an appropriate lawyer, while the lawyer typically publishes an own dedicated department in a convenient method, and to provide an offering method of the lawyer matching service, a clientele terminal application of the lawyer matching service and lawyer terminal application of the lawyer matching service.

21. Brief about Invention

Lawyer matching server according to the present invention for achieving the above-described object, a customer management unit for managing by storing the member information of a pluralation of registered customers registered in the member information DB, a pluralation of lawyers registered as members classified by legal field and a lawyer management unit for storing and managing the membership information DB, A lawyer matching server comprising, the calculation unit of the lawyer matching server receives the information of the legal consultation input from the customer terminal, from the input information of the received legal consultation, the corresponding case of the legal consultation and the function of classifying the registered one or more legal fields, From the attorney management unit, and the function of selecting at least one or more of the registered lawyers who can be responsible for the classified legal field as a lawyer of the case, the lawyer terminal of the lawyer screened by the sorting function by sending the information of the legal consultation, And the function of re-election of at least one lawyer by accepting the case receiving optional information from the lawyer terminal, and the function that can exchange messages using the lawyer terminal of the lawyer that has been re-elected and the customer terminal, from the re-elected lawyer,
It is characterized in that it has a function of matching the membership information of the single lawyer with the member information of the customer based on the information selected by a single lawyer from the customer terminal.

22. Key learning Points

How to provide a lawyer matching server and lawyer matching service according to the present invention as described above has the following

effects.

First of all, it is possible for the customer to grasp whether it is an important case by uploading the evidence material corresponding to the information of the legal consultation together with the legal consultation, and there is an effect that it is possible to do more concrete and effective legal consultation.

Second, it is possible to grasp the case through the evidence material, it is possible to provide the customer by selecting the appropriate lawyer for the case, there is an effect that it is possible to appoint the appropriate lawyer according to the situation in which the person in question is lying.

Third, lawyers can select only the contents of cases suitable for them, provide active legal advice to their customers, provide legal advice that is not suitable for them, and have the effect of eliminating time waste due to legal consultations that tend to be reluctant.

23. Summary of Invention

the lawyer matching server, an input unit for storing in the evidence material DB receives the information and the evidence material of the legal consultation from the app installed in the customer terminal, based on the information of the legal consultation received previously, corresponding incident distribution unit for classifying the case in one or more legal fields of the case-specific law corresponding there to this By selecting at least one or more of the plurality of lawyers already registered by the legal field classified by the case distribution unit, at least by accepting the information of the case receiving arbitrary thoughts from the lawyer terminal of the selected lawyer and also re-elected one lawyer, through legal consultation between the lawyer and the customer. A lawyer sorting unit for finally selecting one lawyer selected by the customer, and the legal consultation processing unit for storing the information of the legal consultation with the lawyer selected by the lawyer sorting unit in the legal consultation information DB, collecting related materials to the case from an external agency server such as a court DB stored in the data DB, and is characterized in that it is configured to include a material collection unit to be provided to the lawyer terminal if necessary.

24. Number of Claims   :   11

25. Patent Status   :   Published Application

26. How much this invention is related with your IDP/UDP?

< 70 %

27. Do you have any idea to do anything around the said invention to improve it? (Give short note in not more than 500 words)

No
